powers and what they are doing to our fair little city in spots is a plenty. I am long on reform when it is general and there are lots of spots in Sunville that need cleaning. I hope that when the cleaners start out that they will get busy first on the spots that need it most, and then go right down the line till we have the real spotless town. In that way the good from the cleaning will be noticeable sooner. If the half way reputable places are made to suffer from the reforms and the disreputable places allowed to go unmolested then the reform will prove a knock on the town and a detriment.
