Many some dairymen have quit business being unable to make profit under the present conditions.

Dairymen believe that the final price in milk will be noticed little by the consumer but in the rate it will mean that they can make a little profit rather than be out of money each month.

The city health department in enforcing certain rules concerning the business has increased the cost of doing business and it is understood that the department is in agreement with the increased price to the consumer.

There is no chance of the price of any food article being reduced this fall or winter," stated another merchant. "Instead you may look for a gradual raise in the price of a number of articles. Among them will be every delicacy made out of flour. Some of the biscuits and cookie factories have already sent out notices of a coming advance. The price in wrapping paper and the paper from which the boxes are made has advanced rapidly adding another cost to their production. It means either smaller cartons or a raise in the price of the size used for several years."

So far there has been no raise in the price of bread in Pueblo although in many of the larger cities, the master bakers have made an advance.

Charles Wilson, a member of the board of three cabinet members designated to draft regulations putting the child labor law into effect, issued a statement tonight replying to questions that the law could be evaded by holding the product in storage for thirty days after manufacture. Those who attacked the law, he said, failed to distinguish between producing plants and warehouses, which might be located under the same roof and still be under the meaning of the law.
