**Many Laud Efforts
Of Local Club To
Reduce City's Tax**

Favorable comments, both verbal and in writing, in regard to the efforts of the Pueblo Commerce club to accomplish some reduction in the tax burden on the city of Pueblo, have been received at the office of the Commerce club during the past week.

The following letter on the subject was written by the president of the Steelworks Employees association, for that organization.

"To The Pueblo Commerce Club:
"We have been very much gratified from time to time to receive from you at our monthly meetings reports of the activities of The Pueblo Commerce club in general.

"We have been particularly gratified at the efforts of the Commerce club to co-operate with the officials of this county, city, school districts and water districts to hold expenses

Repairs are being made at all the Holly Sugar corporation dumps and beets will be received the middle of the week. The weather Sunday morning so all the farmers this part of the valley thinking that October has well begun and brought to their minds the fact several times after a beautiful like the present there was a most sudden change and the beet harvest was anything but pleasant or profitable and once or twice it has happened that hundreds of tons of beets have been frozen in the ground and stayed there until plowed out next spring. It costs about twice as much to harvest a ton of beets in snow, wet fields or frost as it does to gather the same beets in fair weather so a great deal that it thought would be gained in increased tonnage by letting the beets stay the ground is lost by the expense harvesting them in poor weather. The American Beet Sugar company, owing to a shortage of beets the past week the factory has grown only about 50 per cent of capacity but there is a good prospect now there will be a sufficient amount of beets within a few days to increase the output to capacity. The Holly mill at Swink will probably be grinding the twelfth of this month. Field Superintendent Kibby is this week taking samples and so far found both tonnage and content satisfactory.
